- 65 of 65. The quality assurance (QA) team at Cloud Kicks is reviewing user stories to write test scripts. The QA team is having difficulty with a specific story where a modification to an existing flow is needed for a custom object. The QA team is unable to discern what needs to be tested as a result of the updated flow.

What should the business analyst review and revise to provide more clarity to the QA team?

- A. The who, what, and why of the user story
- B. The acceptance criteria of the user story
- C. The definition of done of the user story
